CREATES / Henry M. Rowan College of Engineering is pleased to announce new Ph.D. fellowships in Transportation Engineering and Engineering Education, supported by the US Dept. of Education’s Graduate Assistance in Areas of National Need (GAANN) program. We invite qualified students to apply to become GAANN Fellows.

**Generous Funding Package**
- Living stipend based on demonstrated financial need
- Full tuition + fee waiver
- Travel support & allowance to cover professional expenses

**Program Highlights - Professional Training**
- Conduct cutting-edge in the diverse field of transportation and engineering education to choose from: innovative construction materials, pavement technologies, resiliency of transportation systems, bridge evaluation, and engineering education with emphasis on professional identity formation.
- Over 150 courses to choose from across several departments and colleges
- Dedicated, award winning faculty with expertise in all aspects of transportation related fields
- Complete not just in technical areas, but also critical skills of teaching, mentorship training, public speaking, entrepreneurial thinking, strategic technical and grant writing, gender-racial bias, and job-placement.

**About Rowan/CREATES and Location**
CREATES is a comprehensive transportation research center with a mission to conduct cutting-edge, applied, and readily implementable research through the creation of an inclusive work environment that educates and trains the next generation of technical professionals.

Rowan University is a comprehensive, public research university with over 19,000 students. Rowan is located in Glassboro, NJ, which affords all the conveniences of a quintessential college town. For big city amenities, downtown Philadelphia is only 20 minutes away.

**Eligibility & Application**
- US citizens and Permanent residents
- B.S. or M.S. in engineering or a related discipline
- Admission details are at: 
  - [go.rowan.edu/gostars](http://go.rowan.edu/gostars)
  - Email: gostars@rowan.edu
